PRÜFTECHNIK

EDDYCHEK® 605 compact

The economic eddy current testing system for reliable quality and process control

- tubes, bars & wire - all applications
- fully digital signal processing
- modular structure – expandable
- up to 5 channels at 3 test positions

Reliable semi-finished product testing

EDDYCHEK® 605 compact – Technical Data

General	
	Reliable, economical, powerful eddy current testing system for use in production with fully digital signal processing: each channel with its own oscillator and its own patented* digital demodulator. (*U.S. Patent 8,841,902)
Applications	
Field of application	Final testing and quality assurance in the production of tubing, pipe, bar, wire, strip, cable sheathing, extruded sections (roll forming, tube mills, drawing machines)
	Process control (e. g. cut lengths and coil-to-coil)
	Any conductive material e. g. nonferrous, ferrous metals (ferritic, austenitic, duplex)
Testing modes and speeds	Inline: Continuous production with cut-off (e. g. welding lines) max. 20 m/s
	Wire: Continuous production with cut-off (e. g. drawing lines, hot rolling mills, level winder) max. 250 m/s
	Offline: Testing of cut lengths, max. 10 pieces per sec.
	Stop-and-Go: Cold forming applications
	Speed measurement with encoder up to 40 kHz
	Speed measurement with light barrier
Marker resolution	1 mm at v < 1 m/s
	10 mm at v < 10 m/s
	100 mm at v < 100 m/s
Testing procedure	Multichannel, multifrequency testing (differential system)
	Band width approx. 15 kHz
	Up to 5 channels at up to 3 testing positions: combination of rotational, differential, absolute and FERROCHEK channels
Parameters	
Frequency and filtering	Test frequencies: 41 discrete frequencies 100 Hz – 1 MHz
	Filter frequencies HP 0,008 – 20 kHz; LP 0,015 – 40 kHz
	Each coil driver with its own oscillator and each channel processor with its own patented* digital demodulator (no multiplexing!)
	Speed-coupled, automatic bandpass filter (optional)
Phase rotation	0 – 359° in steps of 1°
Gain	-12 dB to 120 dB in 0.1 dB steps for absolute, differential and rotational channel
Coil monitoring	Monitoring of the transmitter and receiver coil
	Automatic reading of the coil information when using Smart Sensors
End signal suppression	Control of testing signals at start/finish of cut lengths
Data processing – via external PC and monitor	
Signal processing and defect evaluation	Signal evaluation with masks types and 3 alarm thresholds
	– Circular masks
	– Mirrored sector masks, 2 pair/channel with remaining sector
	– Y mask
	1 oder 2 XY displays with any channel selection
	1 oder 2 RT displays with any channel selection. Without data loss the signal can be stopped, zoomed and scrolled back into the past
	Classification of the test pieces in up to 3 sorting classes according to flaw type, flaw density and number of flaws
Test results	Compilation on 2 levels: per order and part/batch/shift
	Save the test results order-related as XML file (single alarms, RT value, XY data)
Interface to a SQL database (optional)	For storing lines parameters, test parameters and test results

Software	
Signal evaluation	Multitasking RTOS, non-volatile
User interface	via external PC and Monitor – Touchscreen operation using icons
	Archiving of testing parameters for later retrieval
	Sample test mode: testing of individual lengths for quality control checks and parameter verification
	Graphical user interface and context sensitive help in local language
	Password protected supervisor level for adjusting basic testing parameters and locking access to parameters with user level rights
Reporting software	EDDYTREND: Viewing and analyzing of testing signals; identifying quality trends (option)
Data transfer	Standard LAN: Ethernet (TCP/IP), 1 Gbit/s
Hardware	
	Environmental protection IP 52 against dust and dripping water
	Shielded housing and internal power supply filter to prevent interference according to VDE843 CE EN 50081-2 and IEC 801.1-4 EN 50082-2
	Standards fulfilled according to EMC: DIN EN 61326-1; VDE 0843-20-1:2013-07; (IEC 61326-1:2012); EN 61326-1:2013; DIN EN 61326-2-2; VDE 0843-20-2-2:2013-08; (IEC 61326-2-2:2012); EN 61326-2-2:2013
	Dimensions (HxWxD): 355 x 444 x 305,5 mm; 8 height units (13.98" x 17.5" x 12.02")
	Weight: max 20 kg (44 lb), depending on number of channels
Operating conditions	Temperature range: -10°C – 40°C (14°F – 113°F)
	Heat dissipation with temperature-controlled fans
Input and output interfaces	
	12 inputs potential free 24 V
	12 outputs potential free 24 V, 1 A/output, 2 A in total per system
	Max. of 10 delayed or undelayed potential free marker outputs; max 3 sorting outputs
	1 system error output
	1 line encoder input, 2-track
	Network: Ethernet (TCP/IP)
Power supply	
	100 – 240 V; 47 – 63 Hz
	Power consumption: max. 300 VA
